All Memberships are specialist contractors and associated companies within the subsidence repairs, underpinning, retrofit basements and engineered foundation solutions.

We have a core of long serving highly professional staff: working directors, managers and site foremen who provide comprehensive and continual supervision on site throughout each contract.

Munster Groundwork knows that great workmanship comes from great workmen. That's why each member of our team is fully trained, and each holds a CSCS Health & Safety certificate.

It's why our workforce is renowned for the helpful, supportive way it explains all work to customers. We won't keep you in the dark because we know you come first.

We're the safe choice for your underpinning or basement needs, from commercial premises or new-build development.
